## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on April 23<sup>rd</sup>, 2008 was filed after the mailing date of the Notice of Allowance on January 11<sup>th</sup>, 2008. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

### **Examiners's Amendment**

An examiner's amendment on the record appears below. Should changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Collin Harris on December 28<sup>th</sup>, 2007. The application has been amended as Follows:

***IN THE CLAIMS***

Cancel Claims 7-10, 12-13 and 15-16.

Claim 1

1. (Currently Amended) A mixing tank for a fuel cell, comprising:  
a container housing fuel for the fuel cell;  
an absorbent member housed in the container, the absorbent member having a space; wherein the space is substantially enclosed by the absorbent member;

an inlet flow path interconnecting the fuel cell and the container so as to conduct an exhaust from the fuel cell to the container and admix the exhaust with the fuel to form a mixture absorbed in the absorbent member;

an exhaust flow path interconnecting the space and an outside of the mixing tank so as to conduct gas in the space to the outside; and

an outlet flow path interconnecting the absorbent member and the fuel cell so as to conduct the mixture absorbed in the absorbent member to the fuel cell.

Claim 14

14. (Currently Amended) A fuel cell system comprising:  
a fuel cell having an anode, a cathode and an electrolyte membrane put therebetween;  
a container housing fuel for the fuel cell;

an absorbent member housed in the container, the absorbent member having a cavity therein; and wherein the cavity is substantially enclosed by the absorbent member;

an inlet flow path interconnecting the fuel cell and the container so as to conduct an exhaust from the fuel cell to the container and admix the exhaust with the fuel to form a mixture absorbed in the absorbent member;

an exhaust flow path interconnecting the cavity and an outside of the mixing tank so as to conduct gas in the cavity to the outside;

an outlet flow path interconnecting the absorbent member and the fuel cell so as to conduct the mixture absorbed in the absorbent member to the fuel cell; and an air supply unit supplying air to the cathode.

### **REASONS FOR ALLOWANCE**

Claims 1-6, 11 and 14 are allowed.

The prior art does not teach or suggest a mixing tank including all of the claimed features. The most pertinent art includes Shimizu et al. (U.S. Patent No. 4,562,123) and Wilson et al. (U.S. Patent No. 6,808,838 B1).

Both the Shimizu et al and Wilson do not teach or suggest:

an absorbent member housed in the container, the absorbent member having a space; or cavity, and wherein the cavity or space is substantially enclosed by the absorbent member,

an inlet flow path interconnecting the fuel cell and the container so as to conduct an exhaust from the fuel cell to the container and admix the exhaust with the fuel to form a mixture absorbed in the absorbent member;

an exhaust flow path interconnecting the space or cavity and an outside of the mixing tank so as to conduct gas in the space or cavity to the outside; and

an outlet flow path interconnecting the absorbent member and the fuel cell so as to conduct the mixture absorbed in the absorbent member to the fuel cell.

For these reasons, the claims are allowed over the prior art. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "comments on Statement of Reasons for Allowance."
